

Request under Freedom of Information Act 2000 – our ref: FOI 19/20_283

I write in response to your request under the Freedom of Information (FOI) Act.

The Trust does not hold the information you requested ...

1. *The total number of **individual doses** of intravenous voriconazole administered to patients in the above organisation during the above period.*
 - a) *Please note, this request **does not** relate to the number of dose units of voriconazole injection used (as one dose may use more than one vial).*
 - b) *Please note, this request **does not** relate to the number of patients given intravenous voriconazole (as one patient will usually receive multiple doses).*
 - c) *I appreciate that this information will probably only be available if the above organisation uses an electronic prescribing and medicines administration system.*
 - d) *If this information is only available for part(s) of the above organisation, please provide this partial information and state to which parts of the organisation it applies (see also point 2a below)*
2. *The **total** number of **dose units** of voriconazole intravenous injection supplied for use within the above organisation during the above period.*
 - a) *If for request 1 you are only able to provide information for part of your organisation (see point 1d), please **also** state the number of dose units of voriconazole injection supplied for use within these same areas.*
 - b) *Please **exclude** voriconazole injection supplied by the above organisation for use within a different organisation.*

Unfortunately we are unable to provide this specific information. Voriconazole is held as stock on wards and individual doses would be recorded in individual medical records and not centrally. As it is not recorded on our systems, it would not be possible to find this information within the timeframe allowed for FOI.

3. *In the above organisation, is the NHS Injectable Medicines Guide (commonly known as "Medusa" - <http://medusa.wales.nhs.uk/>) used at ward level by staff preparing intravenous medicines for administration to patients?*
 - a) *If the NHS Injectable Medicines Guide is only used in this way in parts of the above organisation, please state these areas.*

The NHS Injectable Medicines Guide is used Trust wide.
