• The highest charge rate agreed to pay an agency nurse per hour for each speciality.

The way the Trust holds data on agency nursing use does not lend itself to analysis by specialty. The Trust can provide data for the highest agency nurse rates overall. The rules requiring use of framework agencies for nursing came into force on 1st September 2015 and the rate caps on agency nursing applied from 23rd November 2015. The 12 month period for which data has been requested therefore includes periods before these regulations were in force. The most expensive shift within the 12 month period was £72.33 per hour in August 2015 for a weekend shift in the Emergency Assessment Unit. All non-framework usage for registered nurses was eliminated by the end of November 2015. Since then the highest rate paid for an agency nurse was £39.98 per hour for a Cath Lab Nurse (an extremely specialised role).

The highest margin an agency has declared per hour, for each speciality for nursing.

The data held by the Trust is not organised in a way which would facilitate being able to systematically identify the margin on each shift, nor to analyse that by speciality. Therefore we are unable to provide the information requested.

• Any agency which has been blacklisted from supplying nurses to the trust.

The Trust does not have a blacklist of agencies.

• If the trust uses any 3rd party payment systems and/or master venders in place who cascade shifts out to agencies, if so what are they called.
