<b>CQC Provider ID</b>	<b>RNS</b>
<b>Legal Status</b>	<b>Organisation</b>
<b>Telephone</b>	<b>Switchboard - 01604 634700</b>

## PART TWO

- *Aims and objectives*

Northampton General Hospital (NGH) aspires to provide the very best care for all our patients. We recognise though that this aspiration on its own will not be sufficient. We therefore intend to achieve this by delivering the safest, most clinically effective acute services focussed on the needs of the patient.

Our vision is to provide the best possible care for all our patients. Our services may be delivered from our acute hospital site in Northampton, Danetre Hospital in Daventry, Cliftonville or Blenheim ward (located in the Cliftonville Care Home), The Angela Grace or by our staff in the community.

Our strategic aims are to:-

- Focus on quality and safety
- Enabling excellence through our people
- Transform our services to deliver better care and value with long term sustainability
- Ensure a financially sustainable future

## PART THREE

- *Location(s) and*
  - *The people who use the service*
  - *The service type(s)*
  - *The regulated activity(ies)*

NGH is a major acute hospital offering a full range of acute services and has operated on this site since 1793. We also provide a range of specialist services to prevent patients having to travel out of Northamptonshire and a range of secondary care services delivered in

facilities around the local area to ensure care closer to home. The Trust has set out to formally pledge commitment to continuous improvements in quality of care and patient safety by building and improving the focus on corporate accountability for clinical performance which has been developed over the last few years.

NGH provides services from five sites. One is based in Northampton town centre providing a full range of acute services and the second in Daventry, providing a more limited range of acute services. In addition, patients who are awaiting discharge may be transferred to Cliftonville or Blenheim ward, located in the Cliftonville Care Home and from July 2016, NGH provides services from The Angela Grace located near the Trust town centre base.

The Trust provides general acute services for a population of 380,000 and hyper acute stroke, vascular and renal services to the whole of Northamptonshire, a population of 692,000. The Trust is also an accredited Cancer Centre and provides cancer services to a wider population of 880,000 to the whole of Northamptonshire, and parts of Buckinghamshire.

The Trust has recognised that the landscape for the provision of acute healthcare is changing rapidly and so has focussed its recent developments on developing its hyper acute services capacity on the main Northampton site, as well as providing more care to the local community through our hospital in Daventry.

Hyper acute service development has included cancer, renal in-patient provision, hyper acute stroke services, vascular services and cardiology services. This has broadened the portfolio of the Trust and the Trust is engaged in the process of integrating these services with existing operations with a view to maximising clinical quality and earnings potential through high quality, patient centred care. Outpatient and day surgery services are provided at Danetre Community Hospital. Patients who are awaiting discharge may be transferred to Cliftonville or Blenheim ward, located in the Cliftonville Care Home or The Angela Grace which are both situated adjacent to NGH.

We aim to grow our reputation as the hospital of choice, by offering more services closer to the patient's home through developing more hyper acute services and by offering more outreach services.

A full range of the services provided by Northampton General Hospital NHS Trust is detailed in the table below.
