

Ward staffing levels by ward for September 2014

Scope: The ward staffing charts cover inpatient areas only & exclude A&E, clinics, Sister On Call, outreach & community nursing teams, ward administrators / trackers, housekeeping staff & outpatient areas. Charts do not count supernumerary nurses and support staff working alongside their established colleagues (for example, European nursing staff induction and training periods).

Aim: These charts aim to show the planned number of registered nurses / midwives and unregistered support staff allocated to early, late and night shifts, and the numbers of nursing staff that actually worked on each shift. They are a basic indicator of staffing levels across the month. However, they neither indicate the nursing skill mix on each shift, nor how many patients were on the ward, or their levels of illness (acuity), all of which affect actual staffing numbers.

How to view wards: The charts are organised in alphabetical order by ward with the exception of the Child Health and Maternity wards, which are flexible, combined units. Shifts are listed in date order with the number of planned and actual staff in blue columns for registered nurses & midwives, and pink for Health Care Assistants & Maternity Support Workers plus other unregistered support workers.

Depending on the ward, shifts can vary eg. start/finish times and shift length. To ensure the safest possible patient care, Matrons and Ward Sisters review their patients and manage their actual staffing levels and skill mix throughout the day/night.

Shifts are identified as follows:

Early: Early morning until mid or late afternoon

Late: Early afternoon until evening mid to late evening

Day: Standard office hours eg. 0800-1700

Long Day: Combined Early and Late shifts – early morning to mid or late evening

Night: Evening until early morning
