

Tests not included on our accredited scope

The following tests are currently not part of our accredited scope but still follow the same in-house verification processes to ensure they are safe to be offered.

If you require any further information, please contact the laboratory via ngh-tr.pathqms@nhs.net

Biochemistry

- C-Peptide
- Insulin
- HDL Cholesterol
- Homocysteine
- Cyclosporin (CSP)
- Tacrolimus
- Faecal Calprotectin
- Protein Electrophoresis Immunotyping
- Albumin
- Unsaturated Iron Binding capacity (UIBC)
- Sweat chloride
- Sodium (Direct ISE)

Haematology

- Screening for haemoglobin variants
- Confirmation of haemoglobin variants identified from screening
- Malaria Screening
- Sickle haemoglobin screen
- HLA B27
- Foetal maternal haemorrhage

Microbiology

- Antimicrobial susceptibility testing of clinically significant yeast
- SarsCoV 2, Influenza A&B
- Automated Culture
- Detection of clostridium difficile toxin A/B
- General isolation of micro-organisms of clinical significance
- Cryptosporidium and Giardia antigens
- H.pylori antigen
- RSV A/B
- Norovirus, C.Difficile
- Detection of genomic DNA from bacteria causing infectious gastroenteritis: Salmonella spp., Shigella spp. Enteroinvasive E.coli (EIEC), Campylobacter spp. (jejuni and coli) Shiga toxin-producing organisms (STEC, Shigella dysenteriae)

Histopathology and Cytopathology

- The entire service
